

When time is of the essence...

coin laundry customers need access to high performance, time-saving laundry equipment – specifically, Continental Express high-speed washer-extractors and drying tumblers which not only deliver the cleanest laundry possible, but can complete a wash and dry cycle in less than 40 minutes. Let's face it, in today's fast-paced world, who has time to spend hours doing laundry?

A Wise Investment

for Coin Laundry Owners

When it comes to satisfying the customer, coin laundry owners know better than anyone else, the importance of providing reliable, convenient equipment and attractive amenities to meet the needs of their customers.

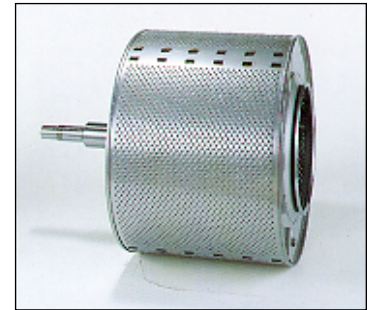

Often times, it's the ability to listen closely to customer requests and respond promptly to changing demands that can keep a coin laundry owner ahead of the competition, and build a solid foundation for the future. Nowadays, when time is considered a premium commodity by many individuals, having access to laundry equipment that can complete a wash and dry cycle in less than 40 minutes provides one more reason for people to choose your facility over the competition.

Continental Express washer-extractors and drying tumblers, are specially designed with features that not only deliver superior cleaning performance, but

Continental's exclusive autobalance system absorbs up to 95% vibration, which allows the machine to be free-standing and achieve powerful water extraction speeds.

can also increase customer turnover to generate the fastest return on your investment. Features such as high G-force extraction speeds on Express washer-extractors, which are almost four times greater than a standard hard-mount washer, can minimize water retention in garments for faster drying. And Continental's automatic chemical injection feature, which automatically injects chemicals at a precise point in the wash cycle, eliminates the need

Enclosed, one-piece construction, with the shaft protected by unique V-seal provides ultimate protection for the main bearing. Continental's basket is manufactured from high grade stainless steel with a five-year extended warranty.

for customers to bring detergent, and enables you to increase overall vend price margins while controlling wash quality. When combined with the efficient airflow design and 80,000 BTU input of Continental Express dryers, your customers receive the ultimate in laundry conveniences and performance without costing

you potential profits. The Continental Express Laundry Center – quality washer-extractors and drying tumblers with years of proven reliability in the high-use, institutional laundry market – it could be the smartest investment you've ever made.

When Mike Mokler considered the options on increasing store profits and expanding his customer base, he knew that building an addition to his existing facility was not feasible. "I needed to invest in equipment that could not only meet the needs of my customers, but also generate the fastest return on my investment." That's when he turned to Continental Girbau. "Today's coin laundry customers are continuously looking for ways to shorten their time spent doing laundry, without sacrificing quality and convenience. With Continental Express washer-extractors and drying tumblers my customers can finish laundering their garments in less than 40 minutes and still have plenty of time to enjoy the more important things in life."

Continental Express washer-extractors sport a pleasing design with their black racing stripes and white painted top, front and side panels – they'll surely capture the eyes of your customers.

Constructed with durable, AISI-304 stainless steel inner and outer drums to resist corrosion and help extend machine life, Continental Express washer-extractors are built to stand up to the toughest laundry conditions time after time.

A Preferred Amenity

within Coin Laundry Stores

Coin laundry customers expect more from laundry equipment today than the basic wash and dry functions. They want choices, whether you're referring to equipment features or the type of equipment that could meet their laundering requirements -- customers want to make the best buy for their money without sacrificing quality or convenience. With Continental Express washer-extractors and drying tumblers, you can provide your customers with a host of equipment features including multiple wash and dry cycles, easy-to-use microprocessor controls as well as convenient digital displays that show vend price and time remaining. But that's not all! Continental Express laundry equipment is designed with time savings in mind so that your customer can complete a wash and dry cycle in less than 40 minutes.

Continental Control Panels Designed To Fit Your Coin Laundry

Continental's touch-pad, microprocessor controls offer multiple program selections and convenient displays which are designed to count down vend price and cycle time, so that your customers

Continental Express Washer-Extractor

will always be informed of cycle status.

As an added

benefit, the controls also give store owners the ability to customize wash time and temperatures to increase energy efficiency. And the programmable price feature, on Continental Express washer-extractors, enables coin laundry owners to set various prices during the week

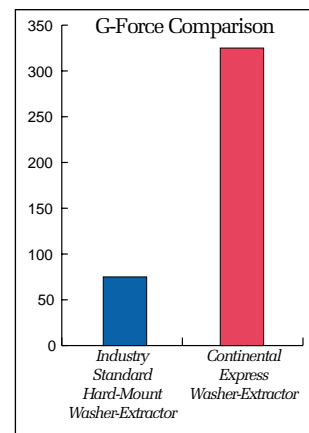

to attract customers.

Continental Express Drying Tumbler

A Washer and High-Speed Extractor All In One!

Continental Express soft-mount washer-extractors combine the capabilities of a technologically-advanced washer and a high-speed extractor into one unit, to achieve a level of moisture removal that is unmatched by standard hard-mount models. In fact, Continental's soft-mount design and autobalance shock absorber system, allows extraction speeds of up to 1020 r.p.m./325 G's to be reached which is almost four times greater than standard hard-mount units.

Automatic Chemical Injection Offers Convenience

Continental Express soft-mount washer-extractors feature a straight-forward chemical and electrical hook-up design, enabling coin laundry owners to connect directly to automatic dispensing units. This feature not only provides a way to control chemical usage and wash quality within your coin laundry, but also offers

Rear of Machine

the ultimate in laundering conveniences to customers since chemicals are supplied automatically.

Installation That's Quick, Easy and Inexpensive

Continental Express drying tumblers and soft-mount washer-extractors are engineered for easy installation. The tumbler, which features higher BTU and air flow, provides two extra large drying cylinders in one unit and requires only one gas, one electric and one vertical vent connection thereby minimizing installation time and expense. Continental's soft-mount washer-extractor does not need to be bolted to the floor which provides for greater flexibility.
